### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01. The omitted elements are: at least a first hinge element and a second hinge element related to the turnable members to perform as "A hinge device". Invention as claimed merely addresses a hinge part rather than a complete, operable hinge. The turnable members and a biasing means alone do not result in an operable hinge device.

In claim 1,

lines 7 and 8, "a first, a second and a third recess" is confusing because "recess" is in singular form. Therefore it is unclear whether there is a plurality of recess or just one single recess.

Lines 9, it is not clear what is being defined as "a side part thereof" and "the opposite side to said second recess". Note similar errors in line 12 ("side part...the opposite side") and line 15 ("side parts") of the claim.

Line 10, "first cam face which is abutted with said projection part" is a conditional statement that is not always true in the claim. Note similar errors in line 13 ("...is abutted") and line 16 ("are abutted...") of the claim.

Line 14, "the reverse direction" is not understood.

In claim 2, line 3, "a single recess as a whole" contradicts with "first and second recesses". An element in singular form cannot be defined in a plural form. The structure as claimed cannot be understood structurally and functionally. Note that the disclosure only defines a single recess 44. If applicant wishes to clarify the intended meaning of the recess 44, the description of the invention should be amended without introducing any new matter.

In claim 3, lines 4 and 6, "non-turnable" is a relative term. It cannot be understood what reference is applied to define "non-turnable". Note similar errors in claim 4.

### ***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3677

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

4. Claims 1-4, as best as understood, are rejected under 35 U.S.C. 102(b) as being clearly anticipated by JP 2003-172335A or Imai (6,305,050).

5. Claims 1-4, as best as understood, are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Oshima et al. (7,251,859).

### **Conclusion**

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
